

Freezer Jam 2010

## **Pair and Share—Small Group Discussion Topics Drums**

Please remember, the sessions are meant to be discussion driven, with you as moderator and mentor, not as lecturer. Start off with some introductions, and see if anyone in the group has a topic they'd like to start with. Start there, and hopefully things will progress on their own.

The discussion can cover one, some, or all of these, in order of your preference, depending on your group dynamic.

- Rudiments
- Practice habits
- Posture
- Phrasing
- Dynamics
- Memorization techniques
- Listening
- Stick control
- Tuning
- Drum care
- Quality tone production

Following the session, please provide some feedback for the committee regarding things that worked well, things that didn't, other topics that came up that weren't on our list, etc. Thank you for your assistance!
